- Application : DPD (PA Digital-Pre-Distortion)

LTC2157-14/12 250Mps

# 2007-2012 Linear Technology (cont.)

- Application : DPD

## Digital Pre-Distortion----- Principle

The DPD-PA cascade attempts to combine two nonlinear systems into one linear result which allows the PA to operate closer to saturation.

The objective of digital predistorter is to have  $y(t) \approx Cx(t)$ , where C is a constant.

The most important step is to extract PA nonlinear behavior accurately and efficiently.

LTM9003 (LTC2157-12 250Msps)

# 2007-2012 Linear Technology (cont.)

- ADC for direct conversion (Huawei module)

## TYPICAL APPLICATION

# 2012-2014 Analog Devices

- Various

- 4X Interleaved 10Gsps (left over from Mobious )
- PID controller for 6MVA IGBT DC-DC ([Siemens HVDC](#))
- GMR sensor for Automotive application (Continental)
- ECG-R with wireless connectivity for (GE Medical)
- [Millimeter wave system for Airport Security \(Rohde-Schwarz\)](#)  
Very interesting subject, how to reduce TB of data from 3008 RF Antenna converted into 14 bit to the main CPU system.

# 2014-2020 Synaptics

- Finger print sensor and NPI (team of 12 people)  
(Samsung Galaxy S6,S7,S8, Huawei,Lenovo,Sharp, Asus etc )  
Manly focus on ATE development in term of FW, Validation, ESD, HTOL.
  - Closely work with operation and design
  - Develop method and Software to systematically:
    - Set ATE limits
    - Detect outlier using custom rejection loops method and MAD technique
    - Define/Design ATE HW (CP, Load Board, related circuit) in collaboration with suppliers  
MPI, Technoprobe, Form Factor
  - Develop technique custom to post-process & filter ATE data
  - Closely works with Module Test for correlation data and customer interface.

# 2014-2020 Synaptics (cont.)

- 2015 define and design first single silicon finger print by using an existing IC originally designed for BGA (PCB based sensor).
  - Collaboration: TSMC/Xintec/Speed to develop the Technology
  - Created Cadence PDK, Calibre DRC/LVS and Raphael PDK (Raphael is a 3-D Field Solver from Synopsis)
  - Tape out 12 different sensors with different pixel size and shape
  - Complete characterization/correlation of all of them.

# 2014-2020 Synaptics (cont.)

- Drive the second generation of integrated finger print sensor
  - Collaboration across several organizations: Package, Module Manufacturing, IHV, Design, ATE, Validation.
  - Unfortunately in 2018 Synaptics shut down finger print

# The Future

[ Hermann Minkowski ]

# 2020

- Founded e-td55
  - Focus on standard/custom product
  - Operating as independent design house
  - Self sponsor
  - Small team of outstanding people
  - Partnership with Asia customer

# e-td55 service portfolio

- **Capacitive sensing**
  - Finger print
  - Proximity sensor
- **AFE interface**
  - ADC/DAC
  - PGA
